

IN THE SPECIFICATION

pg 3
The belt 350 is preferably of urethane (the same material as most skate wheels) because of its toughness and abrasion resistance. Urethane belts of the type illustrated in Fig. 3 are made as timing belts in a variety of sizes, with steel braid or aromatic polyamide such as KEVLAR fabric reinforcement; they are available from BRECOflex Co., LLC, of Eatontown, NJ. The belt 350 has indentations 352 that engage gear teeth when it is used as a timing belt.
